

# Health Emergency Preparedness and Response

**Research Title:** Building Resilient Health Systems for Emergency Preparedness and Response

**Abstract:** The focus of this research is on developing strategies to enhance the preparedness and response capacity of health systems during emergencies. It explores lessons learned from past outbreaks and disasters, identifies gaps in emergency response frameworks, and proposes actionable recommendations to improve resilience.

## Key Sections:

1. Overview of Global Health Emergencies
2. Assessment of Current Preparedness Levels
3. Case Studies of Effective Responses
4. Framework for Resilient Health Systems
